## About *Innovation: management, policy & practice*

'Innovation' is broadly defined as the generation and application of new ideas and skills to produce new products, processes and services that improve economic and social prosperity. The scope of **Innovation: Management, Policy & Practice** (ISSN 1447-9338) encompasses innovation research, policy analysis and best practice in large and small enterprises, public and private sector service organisations, state and national government, and local and regional societies and economies with special emphasis on bridging the gap between academia and practitioners.

**Innovation: Management, Policy & Practice** publishes original research, literature and book reviews, methodology, policy analyses, case studies, education & training approaches, strategy, tactical and finance tips, practice reports, conference reports, booklists, news, products and conferences across all fields of innovation:

- Technology strategy, collaboration and competition
- Technology transfer and innovation support organizations
- Corporate sustainability, reinvention and renewal
- Process and product innovation and diffusion
- Research management and commercialization
- Cross-cultural management and innovation
- Team building and team management
- Managing creativity and creative teams
- Government innovation policy and regulation for innovation
- Managing and commercializing intellectual property
- Managing virtual teams and environments for innovation
- Managing organizational learning, knowledge and change
